

How to Prepare a Latte

This document provides instructions for preparing a standard 16-ounce hot latte, using an automatic espresso machine.

Step 1: Turn on the espresso machine using the “on/off” switch located on the back of the machine.

Step 2: Using a measuring cup and a scale, weigh 18g of espresso beans.

Step 3: Pour the 18g of beans into the bean hopper.

Step 4: Take an empty portafilter and set it into the prongs of a grinder machine.

Step 5: Press the grind button to run the machine. (Refer to Image 1)

Step 6: Take the portafilter from the machine and position it at the edge of a counter.

Step 7: Using an espresso tamper, press downwards to pack in the espresso powder. (Refer to Image 2)

Step 9: Take the portafilter and place it into the grouphead of the espresso machine.

Step 10: Press the button above the grouphead to pull the espresso shots into a mug.

Step 11: While the espresso shots are pulling, pour 14 oz of a milk into a milk pitcher.

Step 12: Tilt the milk pitcher away from you and towards the machine, creating a 45° angle. (Refer to Image 3)

Step 13: Submerge the steam wand slightly under the milk's surface, and turn on the steam wand. Hold the pitcher in place until it reaches 150° F. **(WARNING: The milk pitcher will become very hot. Make sure your hand remains safely on around the pitcher handle to avoid getting burned.)**

Step 17: Grab both the coffee mug and the steamed milk pitcher and hold them inwards at an angle. (Note: Hold the pitcher about 2-3 inches about the espresso to create distance)

Step 18: Pour the milk slowly and steadily, giving the espresso and the milk time to blend together. Enjoy. (Refer to image 5t)
